
Anleitung Nautos

In this database, you can use a search interface to search the full text of currently valid DIN standards and VDI guidelines. You will also find references to draft standards, preliminary standards, and withdrawn standards, as well as information on technical regulations and EU directives from European and international standards organizations, and additional information on construction-related topics.

Access is limited to HSRM members who are either on campus or connected to the HSRM network via VPN. Once you are logged in to the campus network with your HDS credentials or connected to the university network from home via an active VPN connection (you can find instructions on how to set this up [on our website](#)), you can access Nautos [via this link](#) and gain access to the content we have licensed.

In the following guide, you'll find the database's most important features and learn how to conduct searches that yield clear, organized results that provide only what you really need.

When you enter the database, the following screen appears:

The screenshot shows the Nautos search interface. At the top left, it says "nautos basic" and "Version 2.7.0 Metadatenstand 2026-08". On the top right, there are icons for a bell, a question mark, "FAQ", a sun icon, a language dropdown menu set to "DE", and a user profile icon labeled "IP User (IP-User / ReadOnly)". On the left side, there is a vertical sidebar with icons for a home page, a search icon, and a star icon. The main area is titled "Suche" (Search). It features a search bar labeled "Dokumentnummer" with a search button and a dropdown menu for "Suchverlauf". Below the search bar, there are three checkboxes: "Aktuell", "Mit Dokument", and "Firmendatensätze". At the bottom, there is a link "> Erweiterte Suchfelder".

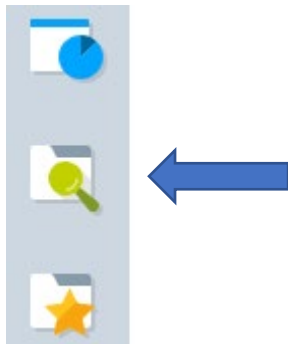

The language menu is located at the very top on the right. You can select German, English, or French as the language for your search interface.

If you click on the question mark or the FAQ, you'll find information about the database interface, as well as tips and tricks for using the search options.

The Sun-Icon  allows you to switch to dark mode.

The following icons appear on the left side:

The most important icon is the one in the middle; the magnifying glass stands for “Search.”

The blue icon provides version information, and the orange icon lets you create and manage favorites.

By clicking on “Advanced Search Fields” below the search field, you’ll see additional search fields that allow you to perform a more precise search by topic.

However, if you already know the number of the standard you're looking for, the simple search is sufficient.

Example 1: Searching for DIN 276 using the simple search

Enter the document number you're looking for:

Dokumentnummer

☐ Aktuell ☐ Mit Dokument ☐ Firmendatensätze

And you'll get the following list of results:

48 Datensätze gefunden

☐ Alle auswählen

Treffer pro Seite

	Dokument	Dokumentnummer	Ausgabedatum	Dokumentart	Titel	Akt.	Aktuell	CE-Info	ICS
>	   	DE DIN 276	2018-12-00	ST, N	Kosten im Bauwesen	C(HB)	 Ja		91.010.20
>	   	DE DIN EN ISO 276	2021-08-00	ST, N	Bindemittel für Beschichtungstoffe - Leinöl-Standöl - Anforderungen und Prüfverfahren (ISO 276:2019), Deutsche Fassung EN ISO 276:2021	U	 Ja		87.060.20
>	   	DIN IEC/TS 62073*VDE V 0674-276	2016-11-00	ST, VN	Anleitung zur Messung der Hydrophobie von Isolatoroberflächen (IEC/TS 62073:2016)	U	 Ja		29.080.10
>	   	DIN276Ert TH	2002-01-16	RG, VV	Bekanntmachung der Einführung von Normen, DIN 276, Kosten im Hochbau; Ausgabe 1993-06	U	 Ja		91.010.20
>	   	DIN 276	2017-07-00	DC, N-E	Kosten im Bauwesen	H	 Nein		91.010.20
>	   	DIN 276	1993-06-00	ST, N	Kosten im Hochbau	H	 Nein		91.010.20
>	   	DIN 276	1990-12-00	DC, N-E	Kosten im Hochbau	H	 Nein		91.010.20
>	   	DIN 276	1954-03-00	ST, N	Kosten von Hochbauten	H	 Nein		91.010.20

The list of results begins with the currently valid standards.

With this icon  you can filter the list of results by various criteria.

When you click on the small arrow  or select the desired standard, a window will pop up providing you with more detailed information about the selected standard, such as version history, brief summaries, and references to other sources where the standard is available

Dokument	Dokumentnummer	Ausgabedatum	Dokumentart	Titel	Akt.	Aktuell

 **Suche anpassen**

Dokumentnummer: din 276

Here you can change or adjust your search parameters, or use the X-button to clear your search query.

If you know the exact standard designation, you can use the exact search by enclosing the exact standard designation in quotation marks, e.g., "DIN 276." This will return a shorter list of results:

Dokumentnummer

"din 276"

☒ Aktuell

☒ Mit Dokument

☐ Firmendatensätze

 **Suche anpassen**

Dokumentnummer: "din 276"

7 Datensätze gefunden

☐ Alle auswählen

		Dokument	Dokumentnummer	Ausgabedatum	Dokumentart	Titel
>	☐	    	DIN 276	2018-12-00	ST, N	Kosten im Bauwesen
>	☐	   	DIN 276	2017-07-00	DC, N-E	Kosten im Bauwesen
>	☐	   	DIN 276	1993-06-00	ST, N	Kosten im Hochbau

Another way to narrow down your search results is to filter by "Current" and "With Document." This will return only those records that are current and available in full text through our license:

Kosten im Bauwesen Building costs Coûts de bâtiment et de travaux publics (btp)		

Printed copies are uncontrolled

The Nautos database also allows you to search by topic.

Example of a topic search using “Advanced Search”:

Enter the search terms in the search field. The search scans all data fields in the metadata records (title, document description, etc.). If you enter multiple terms, they are automatically linked with “and”, meaning all term must appear in die result. When searching with multiple terms, you can also combine them using the operators OR and NOT.

Truncation is supported. The * stands for one or more letters. If you are searching for a technical term consisting of more than one word, it is recommended that you enclose the term in quotation marks. This creates a so-called “phrase search,” which searches for these terms in exactly that order (e.g., “energy assessment”). The number of search parameters you enter determines the accuracy of the results.

Example 2: Search for standards on the topic of sound insulation for (floor) slabs in building construction

Enter the terms into the free-text search

The search results list shows 3 valid records containing full-text documents that match your search criteria. You can now select the standard you want and view its full text.

To filter search results, you can use the “Country Code” field in the advanced search. Here, too, clicking the plus sign opens a window that allows you to filter by the country in which the document was published. Additional filtering options include selecting the document type and the publication date.

This is a brief summary of the most important information on searching for standards in the Nautos database.

If you have any questions about Nautos and how to use it, please feel free to contact us by email service-hlb@hs-rm.de
